

# Nicholas Whyte

nick@nickwhyte.com | +61421128501 | Student at University of New South Wales

---

**Hey, I'm Nick.** I love solving **complex problems**, tackling **technical challenges**, and **creating things** that improve the lives of those around me.

Over the last few years, I've built a strong relationship with web development, both backend and frontend, learning how to approach infrastructure and scale problems. More recently, I've developed an appetite for low level programming, hardware and integrated solutions, and operating systems.

## Experience

- **TwoPi Code - Software Engineer** **2014-Present**  
I am responsible for a significant segment of project planning, design and infrastructure management. I have had great opportunity to be able to work with various cloud infrastructure management tools, including Cloudformation and Terraform. I have introduced code quality measures such as linting and unit tests as well as continuous integration and continuous delivery for most projects.
- **University of New South Wales - Course Tutor** **2015-2016**
  - COMP1917 (15S1, 16S1) - Computing 1
  - COMP2041 (15S2) - Software Construction
- **Atlassian - Software Engineering Intern** **Summer 15-16**  
Primarily worked on company wide logging infrastructure. My team ran a large Elasticsearch cluster, allowing other employees to retrieve and analyze logs in real time. I gained broad knowledge of various AWS services as well as an in depth understanding of Elasticsearch and the problems of running it (and many other distributed systems) at scale.
- **L&J Computers - Technician** **2012-2014**  
Aside from providing IT assistance to customers, during my time at L&J Computers, I developed software to assist with business operations, converting the existing paper based system into a computer based solution for client and job management.
- **McDonalds - Crew Member** **2010-2012**

## Programming

### Languages

Extremely proficient in the following list of programming languages and frameworks

## Projects/Libraries/Contributions

A list of projects I am proud of. Including large open source projects I have contributed to, personal products and open source libraries.

- **Library** Flask-Ldap3-Login - Connect your flask app to your LDAP directory (1.3k Downloads/Month)
- **Library** Flask-Phantom-Emoji - Opensource Emoji for your Flask App
- **Library** Sploitn - Python Helpers for binary exploitation over the wire and locally.
- **Contribution** Kingpin (Golang) - Add bash/ZSH completion support (see pull request #99)

- |              |
|--------------|
| Contribution |
|--------------|

 flask-sqlalchemy - Use Raw SQLAlchemy models with Flask-Sqlalchemy (see pull request #250)
- |              |
|--------------|
| Contribution |
|--------------|

 gitlab-pyapi - Allow Project Issues to be filtered by passing kwargs (see pull request #112)
- |              |
|--------------|
| Contribution |
|--------------|

 flask-menu - Get Arguments for Endpoints & Compatibility with Flask-Classy (see pull request #33)
- |              |
|--------------|
| Contribution |
|--------------|

 GitlabIntegrate(see pull request #7)
- |         |
|---------|
| Project |
|---------|

 L Plater - An iOS app to allow NSW Learners log their driving hours on their phones.
- |         |
|---------|
| Project |
|---------|

 Playlist Grabber - Export iTunes playlists and songs to your Android Phone
- |         |
|---------|
| Project |
|---------|

 ShowCSE - A webapp for CSE students to showcase their projects
- |         |
|---------|
| Project |
|---------|

 Docker-UI - A basic UI for a private docker registry.
- |         |
|---------|
| Project |
|---------|

 Sprinkle - Remote control and timed solenoid control with remote control via iOS app.

See more on GitHub @nickw444

## Additional Skills

- Extremely comfortable with dev/deployment on Linux (Docker, Docker Compose, systemd, Vagrant)
- Broad knowledge of Linux server systems (Debian/Ubuntu)
- In depth experience with Webpack and browser bundling
- Extremely familiar with infrastructure provisioning tools such as Terraform and Cloudformation
- Extremely familiar with most core AWS services

## Education

- **University of New South Wales** **2014-Present**  
Bachelor of Science (Computer Science). Distinction Average
  - |    |
|----|
| HD |
|----|

 Computing 1, Computing 2, Software Construction, Computer Graphics, Extension Operating Systems (3rd in cohort, 97/100)
- **Gymea Technology High School** **2008-2013**  
Completed Information Processes and Technology and Information Technology (VET) one year accelerated, sitting HSC for these two courses in 2012. ATAR: 89.55. School Prefect.

## Achievements & Volunteer Work

- Certificate II In Information Technology. Awarded Sutherland BEN VET Excellence Award
- School Prefect at GTHS
- UNSW CSESoc Dev Head
- CSESoc (UNSW) First Year Camp Leader (2015, 2016)
- Appeared on ABC News 24 Weekend Breakfast for Interview about CySCA 2015
- Published blog post on developer.atlassian.com about Kingpin (Golang) CLI bash completions
- Accurately predicted top 3 results of the Triple J Hottest 100 using OCR and string matching algorithms

## Information Security Study & Competitions

- |             |
|-------------|
| 3rd Overall |
|-------------|

 CySCA 2015 - Played for **UNSW3** (Team of 4)
- |             |
|-------------|
| 1st Overall |
|-------------|

 Ruxcon CTF 2015 - Played for **UNSW (taytay)** (Team of 10)
- |             |
|-------------|
| 2nd Overall |
|-------------|

 Kiwicon CTF 2015 (NZ) - Played for **K17** (Team of 10)
- |             |
|-------------|
| 1st Overall |
|-------------|

 Trend Micro CTF - Played for **K17**
- |              |
|--------------|
| 10th Overall |
|--------------|

 CSAW - Played for **K17** (Placed 1st in Australia)
- |          |
|----------|
| COMP9447 |
|----------|

 Reverse Engineering Suid Binaries in Red Star Linux. Found 3 vulnerabilities
- |            |
|------------|
| CySCA 2015 |
|------------|

 Write-ups for CySCA Web Pentest and Corporate Pentest
